

2 ¼ Tell us everything you know about that number.

Write as many ratios as you can about the participants in our class.

The mean of a set of 4 numbers is 5. Three of the numbers are 4.3; 8.15; and 1.65. **What is** the 4th number of the data set? How did you find it?

246 x 8 Solve mentally and be ready to share your thinking process.
